Moving across the line for age 60.25												
31.44 years of service (including credit for unused sick leave)												
2.330 % of gross salary for each year of service as retirement benefit												
73.24 % of gross salary as retirement benefit (equivalent to 80% of net												
take home salary as explained below)												
2010 retirement year												
\$5,092 /month as retirement benefit (based upon dependent's age)												
(Base salary has been reduced by \$133.33/month, before												
multiplication by percent, because of coordination with												
Social Security, and benefit is 80% for unmodified option.)												
\$3,543 /month for teaching half time under FERP (Recall that there is a 5 year maximum for being on FERP.)												
\$8,635 /month take home while on FERP.)												
% of current take home pay under the above assumptions 136%												
(Recall that no deduction is made for retirement or Social Security since you are retired.)												
Social Security benefit beginning after FERP \$0												
Monthly income in perpetuity, beginning after FERP \$5,092												
(assuming you claim Social Security benefits after FERP												
					% of current					Г	80%	
Present value of retirement benefits for retirement at this age \$774,814												
(based upon life expectancy)												
	tions of		\$324	\$324	\$103					urity, and Med	dicare,	
												\$6,335

Notes: 1. This model assumes Unmodified Option for PERS retirement.
2. The Social Security figures are approximate.
